EXPERIENCE

AddEvent via Yopeso

Backend Engineer · Mar 2022 - Oct 2023

AddEvent is the number one "add to calendar" service on the internet. It helps businesses large and small to manage and share their events.

Highlights:

- Integrating AddEvent API v1 and API v2 with thousands of online products via Zapier.
- Development of API v2, iCal generator and A/B Testing microservices

Raffall via Yopeso

Backend Engineer · Dec 2020 - Feb 2022

Enabling brands, influencers, charities and businesses to run prize competitions and sell tickets to win their products, experiences or personal items as prizes.

Highlights:

- Collaborated to migrate the old stack to the new stack including the infrastructure.
- Organized Bug Bounty program.

Yopeso

Backend Engineer · Mar 2019 - Present

Yopeso is a digital agency that becomes a development partner for both established companies and startups.

Highlights:

- Venti & GEP: global supply and demand platform for medical supplies.
- Vacatio: web-based multi-tenancy employee leave management.
- Pythia: bug prediction with bug caching methodology and software entropy calculation

Metacloud of Sunway Group Malaysia

Software Engineer · Jan 2017 - Feb 2019

One of South-East Asia's leading conglomerates.

Highlights:

- Metabuyer: e-Procurement platform to serve the procurement of the companies under the group.
- 3-way Invoice Matching Service: An external service to integrate e-procurement, Invoice matching service, and the ERP Payment module.

Logistics Consulting Asia

Application Developer · Sep 2015 - Jan 2017

Asia-based supply chain consultant.

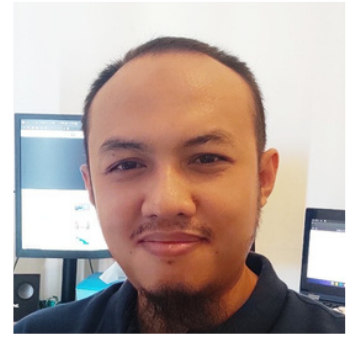

Highlights:

- Distributed Data Sync: data synchronization from more than 300 deployment units across the SEA region
- Data warehouse for BI: organize ETL from OLTP to OLAP schema to produce powerful business intelligence reports.

Various Companies and Agencies

Fullstack Web Developer · Sep 2007 - Aug 2015

Various projects and freelancing since 2007, mostly in Indonesia & Malaysia.
